<i>Dianthus deltoides</i>	Maiden Pink
<i>Gaura rivale</i>	Purple avens
<i>Yudbeckia triloba</i>	Bushy yellow daisy
<i>Anemone thalictroides</i>	Wild Anemone

These seeds are sold to help with the conservation work of our native flora.

Seeds may be sown during December or as long as the ground is not frozen hard. Simple brush the snow away, loosen up the earth with a hand trowel and scatter the seeds. Then replace the snow and Nature will do the rest. I have had success with this simple method.
